## **Colo Atl Responds to Increasing Demand with 6,400 Square Foot Facility Expansion**

**Latest expansion is Colo Atl's second in three years and serves to meet the rising demand for network-neutral colocation in the Southeast**

**ATLANTA, June 15, 2015** – [Colo Atl](#), the leading provider of network-neutral colocation, data center and interconnection solutions announces today that it is expanding its colocation and neutral interconnection presence at 55 Marietta Street in downtown Atlanta. The latest expansion includes an additional 6,400 square feet for a total of ~24,000 square feet of data center and colocation space in 55 Marietta Street - in direct response to the company's current and prospective growth assessments. Moreover, the latest expansion comes just two years from an expansion that included additional floor space and the establishment of Colo Atl's sister companies, the [Southeast Network Access Point](#) (SNAP) and [Georgia Technology Center](#) (GTC).

"As the U.S. market experiences growth and investment in all areas, but particularly the intersection between fiber deployments for small cell backhaul and content distribution, those that are already in the game need to expand to meet that demand at the core," stated Hunter Newby, Partner in Colo Atl and Founder and CEO of Allied Fiber. "This expansion helps to ensure that there is ample conditioned space ready for the scaling of our national network infrastructure."

Founded in November 2001, the Colo Atl colocation and Meet Me Area (MMA) is a cost-effective neutral carrier interconnection facility for more than 80 local, regional and global network operators.

"In the last few years we've seen a number of new technologies that are changing how data centers operate coupled with the growth of fiber interconnections," stated Tim Kiser, Owner and Founder of Colo Atl. "It's our job to expand and evolve with the technology and facilitate meaningful interconnection capabilities, today and for years to come. The need is apparent and we're responding."

###

### **About Colo Atl**

[Colo Atl](#), a JT Communications company, is the leading provider of network-neutral colocation, data center and interconnection solutions at 55 Marietta Street in the global telecom hub of Atlanta, GA. Colo Atl provides superior network-neutral colocation, data center and interconnection services at an affordable rate. Colo Atl is a network-neutral environment that allows all types of network operators to securely and conveniently cross connect within a SSAE 16 certified facility. Colo Atl has no monthly recurring cross connect fees between tenants and provides exceptional customer service.

Colo Atl is also home to the Georgia Technology Center (GTC), a live laboratory for network equipment vendors to highlight their optical and electrical hardware and operating systems, and the Southeast Network Access Point (SNAP), which provides next-generation Internet Exchange (IX) solutions, including SDN peering, testing, collaboration and implementation.

### **About Allied Fiber**

Allied Fiber was created as the first national, open access, integrated, network-neutral colocation and dark fiber superstructure in the United States. Allied Fiber offers a combined long-haul and multi-access point, short-haul fiber optic system coupled with its own colocation facilities to provide control of the underlying physical assets to all network operators. Established in 2008, the Allied Fiber system is designed to link the international subsea cable landing points in the United States while also providing intermediate access along the route for the inclusion of local networks in to the global network architecture. By managing communications infrastructure as a real estate business for network operators the company has developed a unique platform that enables its customers' growth and profitability, which drives its own. Follow Allied Fiber on [LinkedIn](#) and [Twitter](#).
