FOR IMMEDIATE RELEASE

Vault Telephone Selects Colo Atl for N+1 Redundancy and SSAE 16 Certified Security

Customer data, network security and access to the Southeast Network Access Point (SNAP) were key differentiators

ATLANTA, October 7, 2014 – [Colo Atl](#), the leading provider of network-neutral colocation, data center and interconnection solutions at 55 Marietta Street in Atlanta, GA, announces today that Vault Telephone, a provider of high-grade, low cost voice and data services to carriers, enterprise and government agencies, has joined Colo Atl's growing list of network operators and service providers.

Citing Colo Atl's ability to provide N+1 redundancy, access to multiple tier-1 network operators and its SSAE 16 certified facility; the key differentiator was Colo Atl being home to the [Southeast Network Access Point \(SNAP\)](#). SNAP is a next-generation Internet Exchange (IX) supporting IPv4, IPv6 as well as OpenFlow and Software Defined Networking (SDN).

"Downtown Atlanta is one of the most strategic domestic and international telecom hubs in the world," comments Tom Hadden, Owner, Vault Telephone. "Considering Colo Atl's optimal location, direct access to tier-1 network providers, SSAE 16 certification, access to SNAP and no monthly recurring cross connect fees, colocating here was an easy decision."

Vault Telephone's voice and data services include US Termination, 800/Toll-Free Termination and Origination Services via SIP, CNAM Services, International Termination, Inter-Carrier Compensation Specialization, and 100Mb Tier One IP Connections.

"We are excited to welcome Vault Telephone to Colo Atl's continually growing customer roster," states [Tim Kiser](#), Owner and Founder of Colo Atl. "Vault came to us with a pretty extensive list of colocation, interconnection, redundancy and security demands and we were able to meet them without a problem."

Established in November 2001, the Colo Atl colocation and Meet Me Room (MMR) facility is located across two floors of 55 Marietta Street in downtown Atlanta, Georgia. Colo Atl is a reasonable, accommodating and cost-effective interconnection environment for more than 80 local, regional and global network operators.

About Colo Atl

[Colo Atl](http://www.coloatl.com), a JT Communications company, is the leading provider of network-neutral colocation, data center and interconnection solutions at 55 Marietta Street in the global telecom hub of Atlanta, GA. Colo Atl provides superior network-neutral colocation, data center and interconnection services at an affordable rate. Colo Atl is a network-neutral environment that allows all types of network operators to securely and conveniently cross connect within a SSAE 16 certified facility. Colo Atl has no monthly recurring cross connect fees between tenants and provides exceptional customer service.

Colo Atl is also home to the Georgia Technology Center (GTC), a live laboratory for network equipment vendors to highlight their optical and electrical hardware and operating systems, and the Southeast Network Access Point (SNAP), which provides next-generation Internet Exchange (IX) solutions, including SDN peering, testing, collaboration and implementation.

About Southeast Network Access Point (SNAP)

SNAP is a next-generation Internet Exchange (IX) supporting IPv4, IPv6 as well as OpenFlow and Software Defined Networking (SDN). Its mission is to not only support global peering, but also the collaborative development of an entirely new structure for Internet Protocol network peering. SNAP, located within the Georgia Technology Center, is a public IX built on Brocade equipment and the support of its Founding Members, the Georgia Institute of Technology, Global Environment for Network Innovations (GENI), US Ignite, Southern Light Rail and PeachNet. For more information about the SNAP or to schedule a briefing, contact us at info@SoutheastNAP.com. Follow SNAP on Twitter [@SoutheastNAP](https://twitter.com/SoutheastNAP).
